Re: Remodeling

Dear Members and Guests:

Many of you have watched our construction projects over the past 3 years as we have worked on our pool, the ventilation systems in our locker rooms, and the new Glen Murphy Wellness Center. Last month, McDowell Builders began work to replace our single-pane office windows with insulated glass, repair the rusted areas of our exterior siding, and completely reside our building. This \$201,000 project should be completed by the end of June.

Please note that our exterior walls are constructed with 3-inch thick panels consisting of two “slices” of steel with styrofoam insulation between. It is therefore vital that we maintain the walls, or we could compromise the structural integrity of our entire building.

We have a long “wish list” of interior projects, and we intend to prioritize those in the second half of 2009. However, it was essential that we address the main building structure’s issues first. This 37-year-old facility needed some TLC.

Your input and questions are always welcome. Please feel free to contact me with any inquiries or suggestions that you may have.

Sincerely,

John C. Alexander
Executive Director
